

Hubertus von de Fenn

Associate Director
Gartner Consulting

Hubertus von de Fenn joined Gartner Consulting in 2005. He has more than 20 years of IT experience, both on the user and the consulting side. His main areas of coverage include business-IT alignment, project management and coaching, IT strategies and holistic enterprise architecture development, platform strategies and strategic vendor selection, storage technologies, server consolidation in C/S environments, enterprise backup architectures and concepts, sourcing strategies, the definition of architecture-related standard processes and governance solutions, as well as technology advice for strategic benchmarking projects.

Mr. von de Fenn acts as solution leader for Gartner's Enterprise Architecture, IT Operations and Portfolio Management practices in the D-A-CH region. He is also an engagement director for consulting activities covering a wide range of key accounts in Germany and EMEA.

Prior to joining Gartner, Mr. von de Fenn was a director with the Meta Group strategy and architecture consulting practice in Germany. Before joining Meta Group, he worked as a team leader and project manager for the German telco E-Plus Mobilfunk. He was responsible for strategic system planning, the setup of a new division for IT strategy and architecture, the conception and implementation of enterprise-wide IT platforms, as well as the selection of strategic vendors and technology partners. Prior to that, he worked for Krantz TKT as a technical project manager.

Years of Experience:

9 years with Gartner, 20 years in IT industry

Education:

Mr. von de Fenn holds a degree in Business Economics from the University of Aachen and was trained as an industrial clerk.
